

History

- 1963 Micro-Electric AG was founded with the aim to produce and sell cam timers and motorised potentiometers
- 1990 The company name MICRONOR AG evolved out of the original Micro-Electric AG with the aim to produce and sell rotative sensors into the market
- 1991 MICRONOR introduced a QM system and was given ISO 9001 certification
- 1992 Development of feedback-units, geared limit switches and work with partner for encoders
- 1995 Various partnerships in the area of sensoric (NEMICON, NAN YA, ATIOS, Kübler)
- 1996 Concentration on specialised individual solutions
- 2002 MICRONOR's selling to KMW, Bosch-Rexroth, Harris, Wifag
- 2003 Development of the ZAPfree cable and steps in the direction of Fiber Optic with the MR Series
- 2005 MICRONOR as distributor and manufacturer of sensor solutions with emphasis in the areas of Micromechanics, electronics and optic
- 2005 Product range Visualisation
 Micromechanic
 Optic Sensors
 Specialised individual solutio
- 2006 Development Visualisation with Industry-PC, TFT, OLED and LCD
Development worl wide organization
- 2007 Implementation SAP
Development optic sensors
